

# JOIN OUR TENNESSEE POLLINATOR PROGRAM

*Generate Some Buzz*

ESTABLISHING 10,000 SQUARE FEET OF NEW POLLINATOR HABITAT ACROSS TENNESSEE IN 2021

## STEP ONE: REGISTER

Sign up at [tectn.org/generatesomebuzz](http://tectn.org/generatesomebuzz) to register your new or existing pollinator garden. You can order regionally-adapted seeds there.

## STEP TWO: PREPARE SITE

Observe and prep by choosing a location (ideally full sun), taking soil samples if desired, removing unwanted existing vegetation and turning the soil. Add amendments if needed!

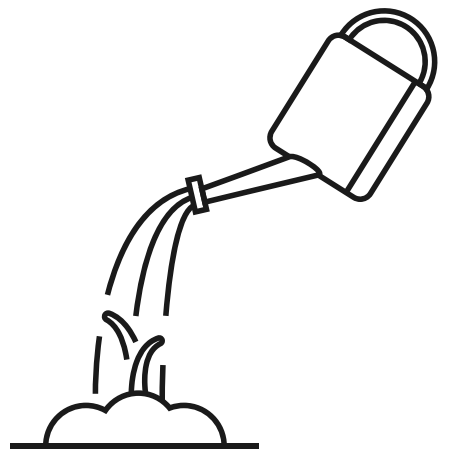

## STEP THREE: PLANT

Plant your seeds in late fall - winter by broadcasting and lightly covering them with soil. Plant seedlings/plants in early spring after the last frost.

## STEP FOUR: MAINTAIN

Maintain the area by consistently weeding and watering (in the beginning stages or during a severe dry period).

## STEP FIVE: MEASURE & REPORT

We'll send a quarterly reminder via email/text to measure and report your garden's total square footage. We encourage you to share photos/videos of your pollinator plot!

For more details, visit [tectn.org](http://tectn.org).
